Dönges brooms and water sliders with Power Stick system

Power Stick picking up is a simple but effective system. All wooden handles with a diameter of 24-26 mm fit into the receptacle and are held firmly – you are not tied to expensive system handles. All brooms with beech wood body and Power Stick holder. The handle must be ordered separately. The right solution for every application:

Elaston bristles:

For coarse dirt on all surfaces.

Bristles from Arenga/Elaston:

For fine and coarse dirt on all surfaces.

Bristles from Arenga:

High wet strength and oil-resistant. For fine and coarse dirt on all floors.

Natural hair bristles:

Extra dust-binding. For fine dirt on smooth floors.

Features:

- high-quality workmanship for a long service life
- the Power Stick holder makes attaching handles quick and easy – no nailing required
- suitable for all wooden handles with a diameter of 24–26 mm
- a wide variety of bristles for almost any application
- can also be used with the Inteletool system with an adapter

Intelletool stands for **I**nterchangeable **T**elescopic **T**ools. A small manufacturer produces these robust tools. The portfolio includes a wide range of common firefighting tools. Previously, a large amount of space had to be allocated for the individual tools (especially the handles). With the Intelletool system, this can be minimised to the smallest of spaces, while still offering a wide selection.

Intelletool telescopic fibreglass handle

The telescopic handles with an interchangeable system offer the user a maximum of flexibility. The handles can be stowed away to save space and can be pulled out to the correct length as required. Thanks to the numerous tool heads, an entire range of tools can be stored in a minimum of space so as to be prepared for any eventuality.

Safety is also not neglected with this system. Fibreglass-reinforced plastic offers a high degree of safety against electrical and thermal hazards. The telescopic function works with a double safety system. The handle can be locked in any length with a quarter turn (**twist lock**). In addition, the handle is secured with the retaining ring.

Features:

- durable and robust material
- double security thanks to twist-lock and screw lock
- continuously adjustable length
- easy change of tool heads possible
- insulated against cold and electrical voltage
- handle end with rubber coating for more grip

Scope of delivery:

1 piece telescopic fibreglass handle without tool head

Item no.	Size	Length m	Handle	Weight g
200859	S	0,61 - 1,22	straight	1,030
200860	M	1,22 - 2,44	straight	1,590
200861	L	2,44 - 4,88	straight	2,950

Intelletool tool head

High-quality, sturdy tool head made of solid metal. The tool head is screwed onto the handle and then secured and fixed in place with the cap ring. Thanks to the modular system, you can store a wide range of tools in a very small space. Simply screw on the required tool head at the place of use and you're ready to go.

Suitable for all telescopic fiberglass handles from Dönges

- made of solid material for high stability and long service life
- space-saving storage of the tool heads possible
- cost-saving, as only one handle has to be procured

Technical data:

Leaf size forest fire patch: 305 x 380 mm
Useful length saw: 310 mm

Scope of delivery:

1 piece tool head without handle

Item no.	Form	Dimension W x H x D mm	Weight g
201150	Tear hook DIN shape	425 x 195 x 60	2,130
