Dönges Rescue knives

The right tool for every application

In a world where every second can make the difference between life and death Dönges and the Böker Knife Manufactory are setting new standards!

For over 150 years, the Solingen-based knife manufacturer has stood for the production of knives of outstanding quality, and under the Böker Plus brand, they have been developing innovative functional and utility knives for professional users for decades.

We are continuing this tradition of reliability and innovation in our close partnership with Böker and are delighted to be able to present three new knife series after more than a year of intensive development work. The high-quality knives are perfectly tailored to the high demands of firefighters, rescue services, police and military personnel and offer numerous practical functions. Our new rescue knives are divided into three series: Basic, Professional and Expert.

Heinrich Böker began manufacturing the famous knives with the world-famous tree symbol in Solingen back in 1869. The manufactory's long history is characterised by eventful times – but one thing has always remained the same over the years: Passion and enthusiasm for exceptional knives. Over the years, Böker has developed into a global innovation leader and the largest manufacturer of sports knives, tactical knives and collector's knives in Europe.

The international success of the product range and the long tradition are both an incentive and an obligation for the manufactory to continue designing and producing high-quality and innovative knives in the future. The knife makers at Böker approach their craft every day with quality awareness, innovative strength and a great love of detail. And because tradition is an obligation, Böker offers a lifetime manufacturer's guarantee on materials and workmanship. This guarantee covers both spare parts and labour costs.

BÖKER PLUS

Dönges Rescue knife

Basic

The Dönges Basic rescue knife is a versatile and practical rescue knife that has been specially developed for use by the fire brigade, rescue services, police and military. It has a lightweight, one-handed blade with a partial serrated edge that can make quick and precise cuts. The aluminium handle is also particularly comfortable to hold thanks to its ergonomic design. The blade is also made from high-quality 440A steel, making it robust and durable. Thanks to its compact format and integrated clip, it can be easily attached to clothing. This makes this knife the perfect choice for use in difficult conditions.

Everything under control

With its moderate and common pocket knife size, the Dönges Basic rescue knife is ideal for everyday use and for general cutting tasks. In an emergency, it is always ready to hand as a professional rescue tool. The practical steel clip (tip-down) makes it easy to attach to clothing so that the knife is always quickly to hand. The pocket knife thus combines the requirements of a high-quality rescue tool with the everyday practicality of a pocket knife.

Features:

- Blade with partial serrated edge
- Two-blade belt knife
- Glass breaker at the end of the handle
- Aluminium handles
- Tip-down metal clip for attachment to waistband or belt
- One-handed operation (the blade can be easily folded down using the thumb opener)
- Blade mechanism with ball bearings

Technical data:

Blade:	Steel: 440A
Handle:	Aluminium
Blade length:	85 mm
Handle length:	120,7 mm

Order-No.	Type	Colour	Blade shape	Weight g

202133	Rescue	Orange	Sheepfoot	135
202134	Tactical	Black	Tanto	135

*Type Rescue without thumb opener

Dönges Rescue knife

Professional

The Dönges Professional rescue knife is an indispensable tool for the fire brigade, rescue services, police and military. With its one-handed operation and partial serrated edge, it enables fast and effective work in emergency situations. The G10 plastic handle scales ensure safe handling, even in poor weather conditions. The interchangeable clip makes it easy to change sides so that the knife can be carried comfortably. The high-quality D2 steel blade guarantees high cut resistance and ensures a long service life for the knife. With the Dönges Professional rescue knife, you have a reliable tool at your side that you can rely on.

Easy handling

The blade length of 11.5 cm is specially designed for heavy-duty use with gloves, including heat-protective gloves. The plastic handle scales are made of heat-resistant G10 with a non-slip Dönges honeycomb structure, which ensures safe handling even in difficult weather conditions. The knife has a four-way reversible wire clip, which enables different carrying methods (tip-up, tip-down right/left) and therefore offers a high degree of carrying flexibility. Additionally equipped with a serration at the blade base for fibrous material, a retractable belt cutter and a glass centre punch, the knife meets all the essential requirements of a professional rescue tool.

Features:

- Blade with partial serrated edge
- Fold-out belt knife
- Glass breaker at the end of the handle
- GRP handle (G10)
- Tip-down wire clip for attachment to waistband or belt
- One-handed operation (the blade can be easily folded down using the thumb opener)
- Blade mechanism with ball bearings

Technical data:

Blade:	Steel: D2
Handle:	Plastic: G10
Blade length:	115 mm
Handle length:	155 mm

Order-No.	Type	Colour	Blade shape	Weight g
202135	Fire Fighter	Red	Spearpoint	255
202136	Rescue	Orange	Sheepfoot	255
202137	Tactical	Black	Tanto	265

Dönges Rescue knife

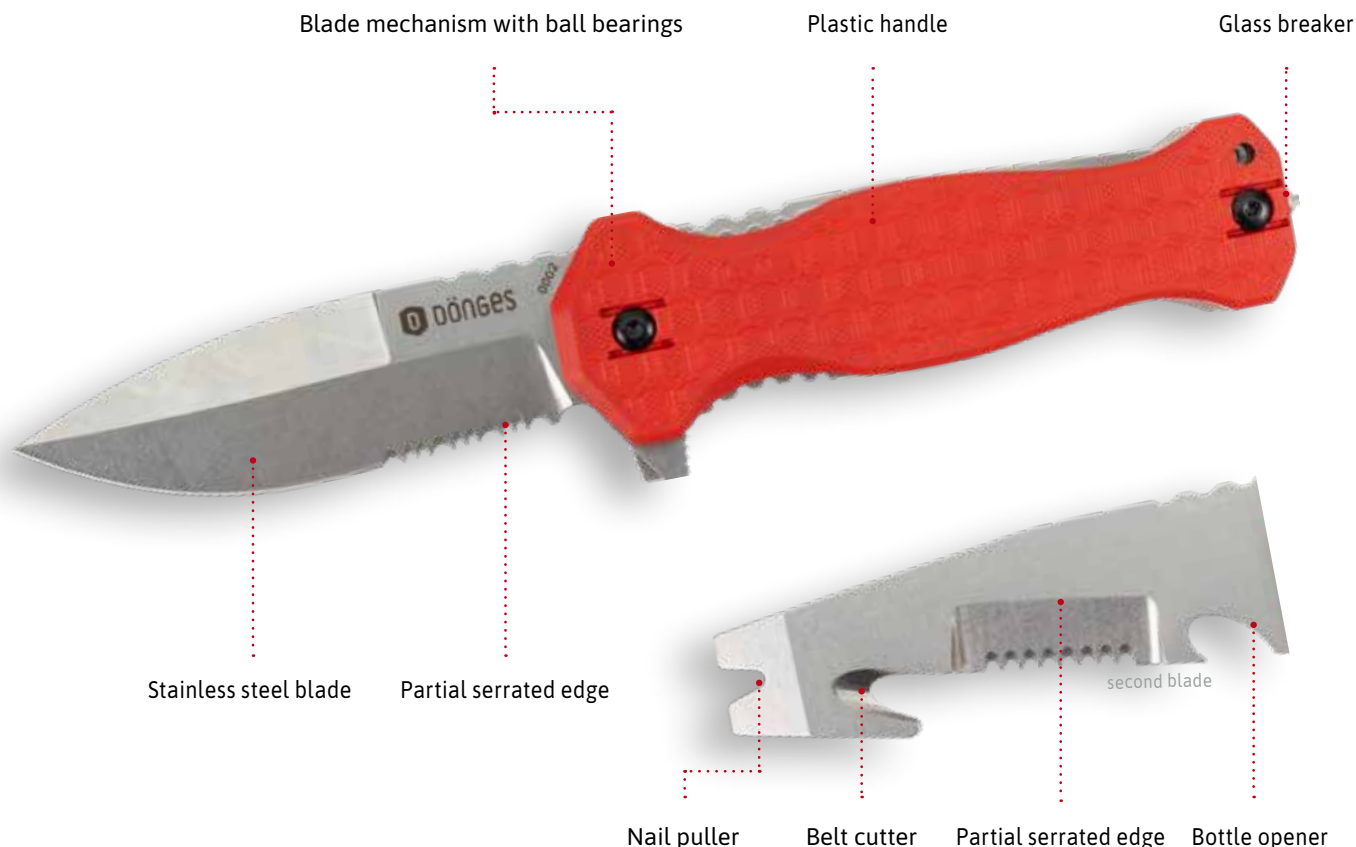

Expert Folder

The Dönges Expert Folder rescue knife is a versatile tool that no equipment should be without. This rescue knife has a robust blade made of D2 steel and a handle made of hard-wearing G10 plastic. It offers two different blade options: The first blade is a spearpoint blade with a partial serrated edge for a variety of cutting tasks, while the second blade is a partial serrated rescue tool equipped with a belt cutter, stopper lifter and bottle opener.

The tip-down wire clip allows easy attachment to the waistband or belt, while the one-handed operation thanks to the thumb opener makes handling and using this knife extremely convenient. With the Dönges Expert Folder rescue knife, you are prepared for any situation and can rely on its dependability and versatility.

second blade

Two blades – many possibilities

Equipped with a robust blade made from D2 steel and a handle made from hard-wearing G10 plastic, the knife offers two specialised blade options. The first is a spearpoint blade with a partial serrated edge, ideal for a variety of cutting tasks. The second blade is a rescue tool, equipped with a partial serrated edge, belt cutter, stopper lifter and bottle opener, specially designed for cutting ropes, belts and the clothing of injured persons.

The two ball-bearing blades of the Expert Folder open in opposite directions and lock reliably with a dirt-resistant linerlock. The rescue blade has additional functional surfaces such as a serrated cutting edge, a lever tip with integrated nail puller and a cap lifter. This versatile tool is therefore perfectly suited to the requirements of rescue operations and for breaks after a mission.

The four-way reversible wire clip allows flexible attachment to the waistband or belt, and thanks to the one-hand operation with finger flippers, both blades can be opened quickly and safely. The red G10 scales with a non-slip Dönges honeycomb structure and an integrated glass breaker round off the knife's high functionality.

With the Dönges Expert Folder rescue knife, emergency services are ideally equipped to act quickly, effectively and safely in any situation. Its reliability and versatility make it a valuable companion in demanding rescue operations.

Dönges Rescue knife

Expert Fixed

The Dönges Expert Fixed rescue knife is a versatile tool for rescue operations and everyday use. With a blade made from robust D2 steel and an ergonomic handle made from G10 plastic, it offers reliable performance in all situations. The included Kydex sheath ensures safe storage and quick access. This rescue knife has a special rescue tool blade with a cutting edge and opposing serrated edge, a chisel tip, a belt cutter and even a practical bottle opener. With the Dönges Expert Fixed rescue knife, you are prepared for any challenge.

Stable in every situation

The blade of this knife is made from edge-holding and rust-resistant D2 steel, which ensures high durability and reliability. The blade has a double-edged design, with a smoothly ground underside for precise cuts and a biting serrated edge on the reverse side, ideal for cutting fibrous materials such as rope and webbing. In addition, the blade has a chisel tip specially designed for penetrating narrow joints and an integrated belt cutter.

The knife's full tang construction features pronounced parrying elements, with the upper element serving as an integrated cap lifter. The handle is made of red G10 plastic with a non-slip Dönges honeycomb structure for comfortable and secure handling.

The Expert Fixed comes with a custom-fit Kydex sheath for safe transport and quick access. The sheath can also be secured with a detachable snap fastener made of fibre-reinforced synthetic material. For flexible fastening options, the sheath can be attached to the equipment either with a modular clip made of stainless steel or through the rivet-reinforced holes using cable ties.

The Dönges Expert Fixed rescue knife is therefore a versatile, durable and reliable tool that is optimally designed for the challenges of rescue situations and everyday tasks.
