

SMOKE PROTECTION CURTAIN "SMOKE DEFENDER"

Smoke Protection Curtain "Smoke Defender"

SMOKE AND HEAT INTELLIGENTLY BLOCKED OUT!

The mobile smoke protection curtain "Smoke Defender" is an effective tool in modern firefighting operations. It serves to prevent smoke and heat from spreading to adjacent areas, thereby protecting escape and rescue routes.

Especially in stairwells and corridors, which can quickly become deadly traps for people fleeing a fire, smoke protection curtains ensure that these areas remain largely smoke-free. This not only facilitates evacuation, but also improves visibility and reduces the risk of smoke inhalation.

The mobile smoke protection curtain is quick and easy to install. Thanks to a robust tension rod with a spring mechanism, it can be securely attached to door frames or other wall openings without causing damage. The flexible material of the curtain allows emergency personnel to pass through the area while ensuring minimal smoke escape. This improves the tactical options available to the fire department for fire-fighting and ventilation.

In addition to protecting escape routes, the "Smoke Defender" also helps to minimize smoke damage in areas not affected by the fire. Furthermore, it enables targeted control of the air intake into the fire room, thereby supporting effective ventilation

measures. This can make a decisive contribution to improving visibility for emergency services and enabling faster rescue of people.

The mobile smoke protection curtain is made of high-temperature-resistant, specially coated fiberglass that can withstand temperatures of several hundred degrees Celsius. The material is also dirt- and water-repellent, making it particularly durable and easy to care for. Due to its low weight and compact transport dimensions, the smoke protection curtain can be easily stowed and transported in emergency vehicles. A carrying bag with practical fastening loops is included for added convenience and secure storage.

Suitable for
door widths of
70-115
cm

Weight
4.750 g

- Effective protection against smoke and heat spread
- Quick and easy installation thanks to robust telescopic tensioning rod
- Suitable for door widths from 70 to 115 cm
- Heat-resistant special fabric
- Space-saving storage in a durable carrying case
- Easy attachment to the hose carrying basket for convenient transport

Smoke Protection Curtain "Smoke Defender"

Scope of delivery:

1x Smoke Protection Curtain
1x Carrying Case
2x Fastening Straps

Order.-Nr.

202704
